

Epidemiologist & Systematic Reviewer

Location: Addis Ababa (office-based; other off-shore remote-working locations considered on contract basis)

Employment Type: Full-Time / Part-Time / Contract

About Epivantage

At **Epivantage**, we don't just collect data; we transform it into the insights that serves as the foundation of drug development and discovery.

We are seeking a meticulous **Research Assistant** to support a team of epidemiologists in building epidemiological forecast models.

Key Responsibilities

- **Epidemiological Dataset Build and Maintenance:** Build, update and curate a library of epidemiological datasets, obtained from public websites via API or manual download, with a suite of procedures for data smoothing, merging and transformation for end use.
- **Template Build and Update:** Update and extend existing Excel templates for the efficient generation of epidemiological forecast deliverables, and continually maintain and enhance those templates.
- **Data Analysis:** Perform pre-specified data analyses on epidemiological or other datasets using Excel or other analysis software (e.g. SPSS, R, Python).
- **Research Librarian:** Maintain and catalogue of research material, including published studies, conference abstracts and public websites, and acquire new research material as needed to support the work of the epidemiologists.

Epi**v**antage

- **Quality Assurance:** Perform quality assurance procedures on quantitative deliverables to ensure consistency and accuracy, and trace any errors to the source for any recommended revisions.
-

What You Bring to the Table

- **Education:** A bachelor or master degree in a numerate discipline, ideally data science or a biomedical sciences-related field.
 - **Technical Mastery:** Excellent analytical skills, and proven diligence in data analysis.
 - **Software Proficiency:** Strong skills in Excel, and ideally some statistical software packages (e.g. SPSS, R, Python).
 - **Communication:** Fluency in written and spoken English is essential.
-

How to Apply

Interested candidates should submit a CV and a brief cover letter outlining a recent project deemed relevant to the role to recruitment@epivantage.com
